

## Abstract

Described is a method of sanitizing animal carcasses using aqueous streams having an antimicrobial composition ~~added to the stream~~. Preferably, the antimicrobial composition includes a mixture of one or more carboxylic acids having up to 18 carbon atoms and one or more peroxy carboxylic acids having up to 12 carbon atoms, preferably a mixture of a C<sub>2</sub>-C<sub>4</sub> peroxy carboxylic acid and a C<sub>8</sub>-C<sub>12</sub> peroxy carboxylic acid. Also described is a novel antimicrobial composition adapted for sanitizing animal carcasses containing a mixture of one or more C<sub>2</sub>-C<sub>4</sub> peroxy carboxylic acids and one or more C<sub>8</sub>-C<sub>12</sub> peroxy carboxylic acids and an alpha-hydroxy mono- or dicarboxylic acid.
